

AI READY COLOMBO

Toolkit contents

Six practical guides designed to be used during and after the AI Ready Colombo learning journey.

01	Starter Guide A practical overview of using generative AI well: prompting, verification, privacy, judgment and the Define - Prompt - Inspect - Verify - Decide workflow.
02	Prompt Templates Ready-to-use CTCO prompts for studying, writing, interviews, planning, comparing options, checking claims and stress-testing ideas.
03	AI Verification Checklist A quick way to decide what needs checking, spot risky claims, verify sources and avoid treating a confident AI answer as proof.
04	AI Privacy Quick Guide A simple guide to safer data sharing, AI privacy controls, memory, chat history, model improvement and what to pause before uploading.
05	AI Study Workflow A repeatable study process for using AI to understand, practise, review and check learning without handing over the thinking.
06	AI Job Search Toolkit Practical guidance for using AI to read job descriptions, improve honest CV wording, prepare applications and practise interviews.

Use the guides individually when you need them, or keep the full toolkit as a quick reference after completing AI Ready Colombo.
